| Jenkins CI | 1 year |
| SQL | 3+ years |
| Unit Testing | 5+ years |
| Affinity Designer | 2+ years |

## Summary

Full-stack software developer with several years of experience developing proprietary iOS applications and leading development efforts. Very passionate about mobile devices and applications, with a keen interest in innovative products.

## Experience

### Co-Founder, Instint.app — Aug 2019 - Present
iOS development on a new productivity application for parents and their teenage children with privacy and a sustainable rewards mechanism at its core.

### Freelance iOS Developer, Nalta Software BV. — Oct 2022 - Present
iOS development for new apps using SwiftUI and Combine.

### Freelance iOS Developer, Ockto BV. — Dec 2021 - April 2022
Native iOS application development using modern design patterns.

### Freelance iOS Developer, Maple Media, LLC. — Jan 2021 - August 2022
iOS development on WeekCal and other Maple Media apps.

### Freelance iOS Developer, Nomads — Nov 2020 - April 2021
Leading iOS development on apps for major global clients. Working with SwiftUI and REST technologies to create interactive interfaces.

### Freelance iOS Developer, Maple Media, LLC. — Aug 2019 - Sept 2019
Supported an iOS 13 update to WeekCalendar after the app was acquired by Maple Media.

### Lead iOS Developer, WeekCal BV — Sept 2014 - July 2019
Development on one of the best-selling productivity apps on the iOS AppStore for iPhone and iPad; architecting product improvements and integrations with internal and external services.

### Senior Software Engineer, Marktplaats BV — Dec 12 - Sept 14
Focussed on agile software development using the best tools available; leading initiatives towards higher code quality and establishing best practices in publishing tested code; led the development of the iOS QA pipeline.

### Software Engineer, Booking.com — Nov 11 - Nov 12
Software engineer in the iPhone team and the main contributor on the Booking Tonight application for same night hotel reservations. Actively involved in regular app updates and maintaining existing codebase. Experience with A/B testing in mobile applications using in-house frameworks. Preliminary exposure to Perl development.

**Software Engineer, eBuddy BV — Aug 10 - Nov 11**

Software engineer with eBuddy in Amsterdam. Contributed to development of the iPhone client and the J2EE based Lite product. Also helped in development of the new XMS product. Daily responsibilities included tight coordination with team members in an agile Scrum methodology as a multi-faceted senior developer.

**Lead iPhone Developer, Mashed Pixel Inc. — Feb 10 - Aug 10**

Consulted as the lead developer on the Surc® project. Surc® is an iPhone application that works with additional hardware to transform the iPhone into a highly customizable universal remote controller.

**Software Engineer, Aol Inc. — Nov 09 - Feb 10**

Lead developer on the AOL Autos iPhone app. The app is targeted to be a research tool for help with buying new and used cars, along with multiple social networks compatibility.

**Software Developer, Beach Street Consulting — Jan 08 - Jul 09**

Enterprise Content Management consulting with focus on Documentum deployment, administration, and custom business process development. Training and certification in ECM fundamentals and the Captiva suite of information capture products.
Major clients: Fannie Mae, National Science Foundation, Government Printing Office, Memphis City Schools system.

**Software Developer, Matrix Technologies, Inc. — Jan 06 - Dec 07**

Started my career as a Documentum consultant after graduating from graduate school. Received training and support for development and implementation of Documentum based ECM systems. Prepared component design documents, installed Documentum content server, developed workflow methods, and customized web applications.
